SUMMARY

Backend & Generative AI Engineer with 2+ years of experience building scalable APIs, asynchronous systems, and agent-based AI workflows. Skilled in FastAPI, distributed systems (Celery + Redis), and LLM orchestration using LangGraph and CrewAI. Experienced in designing production-grade AI platforms with real-time processing.

TECHNICAL SKILLS

Languages: Python, JavaScript, C, Dart

Frameworks: FastAPI, Django, Django REST Framework, Flask

Databases: PostgreSQL, MySQL, MongoDB, Azure SQL

AI/LLM: LangChain, LangGraph, CrewAI, LLM Fine-tuning, GPT, Llama, Mistral

Tools & DevOps: Docker, Git, GitHub Actions (CI/CD)

Async & Auth: Celery, Redis, JWT, Firebase, Azure AD

Frontend: Angular, Flutter (Basic)

Real-Time Systems: WebSocket

EXPERIENCE

Reelwise Entertainment Pvt. Ltd. — Associate Software Developer

March 2025 – Present

- Designed scalable FastAPI backend APIs for a production AI platform.
- Built agentic AI workflows using LangGraph and LLM-based systems.
- Implemented Firebase Authentication and real-time collaboration using WebSockets.
- Developed event-driven architecture for concurrent multi-user systems.
- Managed production database migrations and core architecture modules.

Reelwise Entertainment Pvt. Ltd. — Generative AI Engineer Intern

March 2024 – February 2025

- Developed REST APIs using FastAPI and Flask for AI applications.
- Built multi-agent AI workflows integrating GPT, Llama, and Mistral.
- Developed secure authentication systems and optimized asynchronous task execution with JWT, Azure AD, Celery, Redis, and Azure integrations.

PROJECTS

SentinelOps — Real-Time AI Incident Management System

GitHub: <https://github.com/4lan-R/SentinelOps>

- Developed FastAPI incident management system with REST APIs and WebSocket updates.
- Integrated SQLAlchemy, Pydantic validation, and asynchronous workflows.
- Added Gemini AI analysis for logs, metrics, root cause detection, and recommendations.

Code2Prompt — AI Context Generator VS Code Extension

GitHub: <https://github.com/4lan-R/code2prompt>

- Built a VS Code extension to generate structured code context for LLM-based AI assistants.
- Implemented recursive file parsing, project structure extraction, and clipboard automation using VS Code APIs.
- Optimized generated prompts with Markdown formatting and configurable ignore patterns.
- Improved developer workflow by reducing manual context preparation for AI-assisted coding.

Real-Time Crime Detection and Alerting System

- Built YOLOv8 weapon detection system using custom datasets.
- Implemented SMTP alerting for immediate notifications.
- Designed Flask backend for real-time processing.

EDUCATION

A P J Abdul Kalam Technological University

B.Tech in Computer Science and Engineering

July 2020 – July 2024 | Kerala, India
